## CS205 AS S\*

**Chemstik®** CS205 AS S is an anti-static, PTFE-coated fabric with a high performance, silicone pressure-sensitive adhesive on one side. The PTFE surface exhibits good release properties in demanding high temperature applications. The product has a yellow corrugated liner to protect the adhesive surface and to ease identification and use.

CS205 AS S is used in the packaging industry for covering elements, impulse wires and L-Bar sealers for platen and element covers where an anti-static or black finish is required.
